Real-Time 911 Alerting

AirOneSG is proud to present **AirOneAlert**, Real-time notification and alerting of E911 calls, emergencies, lockdowns and more. AirOneAlert provides for instant notification to your internal first responders when a user dials any defined emergency number in your organization. Providing first responders with additional data such as floor plans, evacuation and lockdown procedures, and more.

- True, real-time, on-site alerts for 911 /112 etc.
- Can be activated by other digits for other countries or forcode calls within a medical facility as an example.
- Centrally monitor and dispatch alerts for multiple sites.
- Dramatically improves response times by sending medical alerts to your internal first responders.
- Can be used to initiate a school, campus or other lockdown.
- Fully customizable alerting options (email, SMS, PC Screen pop audible/visual alarms, custom formats, etc.).
- Historical data is kept indefinitely for future review/analysis.
- Backwards compatible with older PBX's while supporting current and future releases.
- Provides additional staff safety & protection for both small and large businesses at an affordable price.
- Never in the path of the emergency call. Eliminating a potential single point of failure.
- AirOneAlert complements other AOSG public safety solutions and services.

AirOneAlert is a single/multi-site solution available in Client and Web based versions for Premise, Cloud, Virtual and Hosted environments. AirOneAlert fully integrates with other AirOne Solutions providing you with a complete, unified solution. AirOne Solutions group also provides complete North America 911 carrier call routing services and PS/ALI support services in certain regions.

AirOneAlert from AirOneSG is available on legacy Nortel/Avaya Meridian 1, CS1000, Avaya Aura CM, Avaya IP Office, Ring Central and more....
