AirOneAlert Campus Safety and Security Solutions

Safety has always been paramount in all organizations, be it a school campus, or any public or commercial domain. All that we do should be to improve how our people are safer. This could be as simple as a camera showing a walkway, or a sophisticated facial recognition software, pre-alerting to a possible intruder or perpetrator preparing for a catastrophic event. **AirOneSG** has solutions that can help.

AirOneAlert is an emerging technology-based solution for public safety. It is a unique product suite that is designed as modules, that give our clients the ability to build and deploy, in phases, as needed based on budgetary needs or as a total solution.

- Preemptive Safety Measures based on Rules/Algorithms
- Automated Direct Communication with First Responders, Mobile Cell and Radio
- Mass Notification (School Officials, Parents, Local, County, State and National)
- Event and Alarm Notification
- Gunshot Detection and Localization
- Automatic Lockdown Capability
- Fire Safety
- Border/Perimeter Notification & Safety
- Geolocation & Mapping Procedures
- Helps meet Kari's Law and Ray Baums Act compliancy

Safety and Security Issues

Intruder Alerts, Active Shooter, Lockdown Procedures, Video Surveillance Unfortunately, in today's society we have more than the occasional mis-behaved offender. Instead we deal with violent intruders or active shooters. From video surveillance system to access control, a lockdown procedure can begin a process of heading off the threats.

Fire Safety Notification and Procedures
One of the challenges facing a campus environment is that of a fire. Whether it's a fire from equipment malfunction or intentionally set, **AirOneAlert (AOA)** can step in and start all notification procedures leading to a full evacuation. It doesn't replace your fire panels, instead it works in conjunction with them.

Advanced Notification
The following systems **(Radio, SMS, Email, Paging, Campus Monitors etc.,)** are able to disseminate pertinent information as needed. One of the biggest fears facing people today is not knowing where their loved ones are in a large-scale emergency event. Even those not on campus can be handled, including pickup zones via Email/SMS Text.

This can all be going on at the same time, while notifying First Responders with any other relevant information and additional data.
